

Your strong Partner

Our expertise for your logistics

Above all else, efficient logistics requires smart ways to solve logistics challenges. However, smart ways are not always easy to find. The expertise of experienced specialists is needed.

Higher quality, increased efficiency

Our logistics expertise is the crucial when it comes to improving your market position. Your entire company profits from the higher quality and increased efficiency of your logistics department. We provide you with support if your in-house experts do not have sufficient logistics expertise or if your manpower cannot manage several projects at the same time.

Together for better logistics

We combine your experience with our expertise. If necessary, we can also call in further specialists. Together, we work towards achieving one goal: better logistics for you.

Our philosophy

Neutrality

No obligations towards manufacturers or systems

High-quality concepts

Development of applicable concepts, focused on implementation and individual fit

Experience in realization

Long-term experience in holistic project management, from detailed planning to support right through to going live

Competence in purchasing

Negotiation of best prices through professional tendering and placing

Methods

Use of workshops, interviews, meta-plans as well as many other methods

Logistic strategies

Establishment of the optimal level of centralisation

Development of factory plans and master plans

„Make and Buy“

Logistic standardisation

Warehouse planning

Warehouse layouts and material flow concepts

Warehouse and conveyor technique

Picking methods

Synchronisation

Processes and IT

Process-Design and reorganisation

Control of warehouse management systems and the material flow control system

Radio data transmission

Start-up planning and controlling

Strategies for efficient logistics

We consider ourselves strategists. We combine our expertise as planning, purchasing and implementation specialists. We focus on solutions, that are economic and flexible. Our logistics planning is based on modules, which can be implemented step by step. This way, we guarantee that the logistics department grows according to requirements – as much as necessary, as lean as possible.

Many experts united

We have enough resources at our disposal to manage numerous projects at the same time and provide long-term support for our customers. Our in-house specialists have expert knowledge of all of the issues related to your logistics project. So far, we have successfully applied this expertise to more than 600 projects.

Neutral and with sound judgement

As a consultant, we are independent from manufacturers of conveyor technology and logistics equipment. You are our number one priority. When we recommend a logistics solution, we have evaluated all of the possible alternatives independent from the portfolio of a single producer. This way, we protect you from applying too much technique and keep your investment to a minimum.

Distinct procedure

Regardless of the extent of the project, all projects managed by viaLog are organised according to a distinct procedure. Working step by step based on a precise definition of the task, viaLog develops, presents and documents submittals ready for judgement within a predefined time frame.

Customer and consultant hand in hand

A strong local presence and close collaboration with our customers ensures that all challenges are immediately recognised and overcome. We closely integrate our work with your company's processes to guarantee high-quality results and acceptance among all members of the project team.

Take us at our word!

If you would like to know how optimised logistics make your company more efficient and your customers more content, get in touch with us. We promise a productive exchange of ideas, which helps you identify the challenges and opportunities of your company's logistics activities. Get to know us without obligation and decide if viaLog is the right partner for you.
